easyrx
PRACTICE

EasyRx is cloud based universal lab prescription, digital workflow and 3D software for practices and labs.

For the practice, EasyRx features include:

- Write patient appliance, aligner and indirect bonding prescriptions using The EasyRx Universal Lab Prescription Form
- Attach digital files, including 3D Models/ STL files to patients and prescriptions
- Submit prescriptions to your In-House and Commercial Labs
- Manage your In-House lab
- Track patient prescriptions using the Prescription Dashboard, desktop notifications and the Daily Digest Email and Stats
- Third-party case tracking like Invisalign, SureSmile, Clear Aligner
- Communicate securely and efficiently with your labs
- View and base STL files using EasyRx 3D Edit
- Provide Prescription Feedback that is communicated to your labs
- Create customized prescription templates
- View patient prescription history and allergy information
- Integrates with iTero® MyAlignTech and TRIOS® via the 3Shape Communicate™ software (other scanner software integrations pending)
- Integrates with Dolphin Imaging and Management, CS Orthotrac, Cloud 9, topsOrtho, Ortho2, Oasys, Focus Ortho and Wave Ortho
- All prescriptions and files stored securely stored and backed up in the Cloud

WRITE

Use the EasyRx Universal Orthodontic Lab Prescription Form to quickly create write patient appliance, aligner and indirect bonding prescriptions

SUBMIT

Submit Prescriptions to In-House and Commercial Labs, while following prescription workflow. Communicate securely with labs.

TRACK

Robust Prescription Dashboard tracks prescriptions, due dates, notifications, receive daily digest emails

DIGITAL

Attach digital files, including STL, to patients and prescriptions

IN-HOUSE & COMMERCIAL LABS

Submit to your In-House and Commercial Labs. Manage your In-House Lab.

EASYRX 3D

View and base STL files from your browser

Use EasyRx Stats for in-depth reporting and analysis on all your prescriptions – in seconds!

See prescription data broken down by parts, appliances, templates, models, aligner and IDB. See counts and money spent on each item and a prescription total. Drill down for detailed information. Filter by commercial and In-House Lab, office and doctor.

The screenshot shows the EasyRx Stats dashboard. The navigation bar includes 'Dashboard', 'Patients', 'Templates', 'Stats' (highlighted), 'Scripts', and 'Labs'. Below the navigation bar, there are tabs for 'statsboard', 'parts' (selected), 'appliances', 'templates', 'models', 'aligners', and 'idb'. The main content area features a filter bar with 'Date Range' (From: 1/1/2017, To: 9/29/2017), 'Lab(s) (All)', 'Doctor(s) (All)', 'Office(s) (All)', and a 'Search' button. Below the filter bar is a table with the following data:

| Part | Count | Part Total | Rx Total |
|------------------------|---------------------|------------|------------|
| Adams Clasp | 244 | \$2,086.60 | \$6,523.30 |
| Acrylic | 130 | \$3,018.40 | \$7,329.30 |
| Labial Bow | 125 | \$928.60 | \$6,997.30 |
| Recurve Spring | 22 | \$11.10 | \$1,208.50 |
| RPE | 14 | \$625.00 | \$500.00 |
| Ball Clasp | 12 | \$500.00 | \$925.00 |
| Invisible Retainer | 11 | \$100.00 | \$112.00 |
| Anterior Finger Spring | 4 | \$0.00 | \$266.00 |

EasyRx has saved us enormous amounts of time, headaches, and frustrations by streamlining our workflow for lab appliances.

easyrx3D

The easiest and fastest STL basing software available today.

Whether the file is from an intra-oral scanner, cone-beam or from a digital study model service from a lab, EasyRx 3D provides a fast and efficient solution to view and edit STL files.

- 100% Cloud – no software download to view, trim and base your 3D/STL files any longer
- Compatible with standard browsers like Chrome, Safari, Firefox, IE
- Compatible with industry brands like iTero, TRIOS and Carestream

EasyRx View*

- Quickly and easily view standard 3D/STL files inside your browser
- Includes STL File Optimize feature

EasyRx 3D Edit**

- Trim and base STL files
- Artifact Removal Tool
- Add Regular and Hollow bases
- Set base height and wall thickness on hollow models
- Add labels to models, like patient name, date, Rx number
- Save based STL files
- Quick and easy access via EasyFS. EasyFS is a unique file access system providing secure, direct access to files outside of EasyRx, like 3D printer software.

*EasyRx 3D View is a standard feature in all EasyRx Practice and EasyRx Lab plans.

**EasyRx 3D Edit is included in EasyRx Practice Standard and Premium plans and EasyRx Lab Standard, Premium and Enterprise plans.

Why EasyRx?

- **The EasyRx Universal Orthodontic Lab Prescription Form** - Create prescriptions for any appliance or lab item, submit to any lab
- **One application** to manage all patient prescriptions and digital files, including 3D Model / STL files
- **Connect** your Rxs and STL files on a product built for orthodontic lab prescriptions. No longer rely on proprietary lab Rx systems and third party file sharing services.
- **Manage** your In-House lab, improving control, accountability and efficiency.
- **Stop** juggling different portal logins and submitting STL files separately to your labs
- **The EasyRx Universal Library** of parts, appliances and templates allows for prescription standardization across the entire practice
- **Work** from EasyRx to view and base your STL files and integrate into 3D printer workflow
- **One click** remakes and repairs!
- **View** your labs standard price on prescriptions
- **Track** all your cases, with ease, using the Prescription Dashboard, Desktop Notifications and the EasyRx Daily Digest email.
- EasyRx prescriptions **reduce common errors** seen on confusing and sometimes indecipherable hand drawn prescription sketches
- Implement a **full digital prescription workflow** from scanning and uploading your STL files to sending a digital prescription to your labs to basing STL files and sending to your 3D printer
- **Easily** confirm appliances are ready for patient appointments, improving patient experience and reducing reschedules
- **No longer** rely on one or two staff for prescription management and tracking, reducing costs and frustration
- **Secure communication** with your labs, improving your HIPAA compliance
- **Go Green** – eliminate burdensome paper trails with EasyRx
- **Protect** your prescription data. Your data is securely stored and backed up per ADA and HIPAA mandates

Practice Management Software Integrations

3D Printer Integrations

“ EasyRx allows us to streamline our digital workflow by connecting all our office locations to our In-house Lab. It also allows us to pull scans from our different devices. Simply put, it connects all the dots with the different scanners and lab software. We love the tracking ability for appliances. The EasyRx Team is easy to work with and their support is great.

”

Invite your labs to use EasyRx!

Labs using the free version of EasyRx can:

- **Digitally receive** prescriptions from any practice using EasyRx
- Work with **neat, legible EasyRx prescriptions** with supporting digital files attached
- **Communicate securely** with practices
- **Mark prescriptions** as checked in, shipped and provide tracking information
- **Customize** the EasyRx Universal Library of parts, appliances and templates and share with practices using EasyRx
- **Catalog** precise, customized prescription templates for practices
- Configure their **customized acrylic color chart** and decals

Optionally, labs can also:

- Implement **EasyRx Standard** which offers 3D Model Service/3D Edit
- Implement **EasyRx Premium** which offers more integrated workflow features
- Implement **EasyRx Enterprise** which offers production and invoicing features

There is no charge for Commercial Labs to receive EasyRx prescriptions. Plus, they can choose to pay monthly for integrated 3D, workflow, production and invoice solutions.
